

Motivation and Engagement in a Changing World

Higher education faculty and instructional professional development staff from around the world are invited to apply to join Montgomery College's International Dialogue for Excellence in Academia (IDEA) Community of Practice (CoP).

Each month, this small, diverse group of participants will gather virtually to learn, discuss ideas, share strategies, gather local data, and network with global colleagues.

This year's theme explores solutions around imotivation and engagement for students affected by a global pandemic and the rise of artificial intelligence. Monthly topics include: Self-determination theory (SDT), disengagement and burnout, autonomy, belonging, competence, and purpose.
